

The Enclave at White Peak

The largest of the White Peak Trilogy, this 100 acre parcel includes 252 single-family lots of approximately 7,200 square feet each. A large natural wash corridor provides an incredible view of the open desert at the entrance to this community. At the center of the master plan, a large neighborhood park will provide a children's playground, covered picnic tables, and several large turf areas. In addition, the plan includes several pedestrian trails located in the natural desert washes which are the extension of trails designed to connect to Vistancia to the southeast as well as to the north.
